Beyond Power

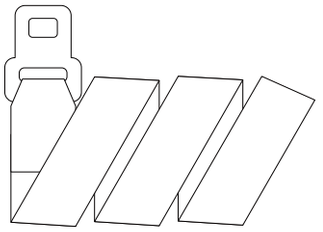

In the Box

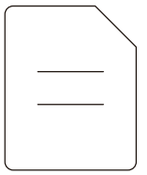

Strap Mount X 1

0.5m Strap X 1

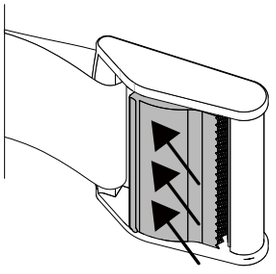

1m Strap X 1

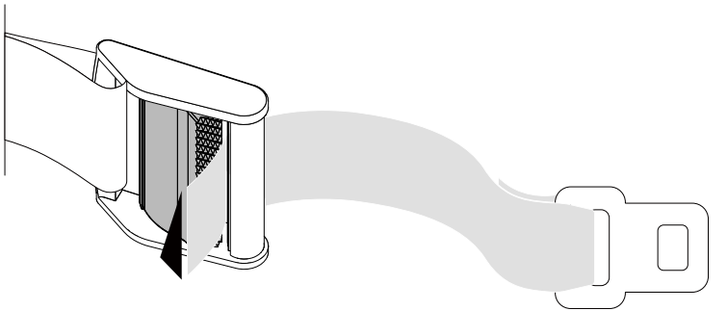

Instruction Manual X 1

Check if all items are included in the packaging. If any item is missing, contact Beyond Power or the local distributor by https://www.beyond-power.com/support or by email at support@beyond-power.com for advance information.

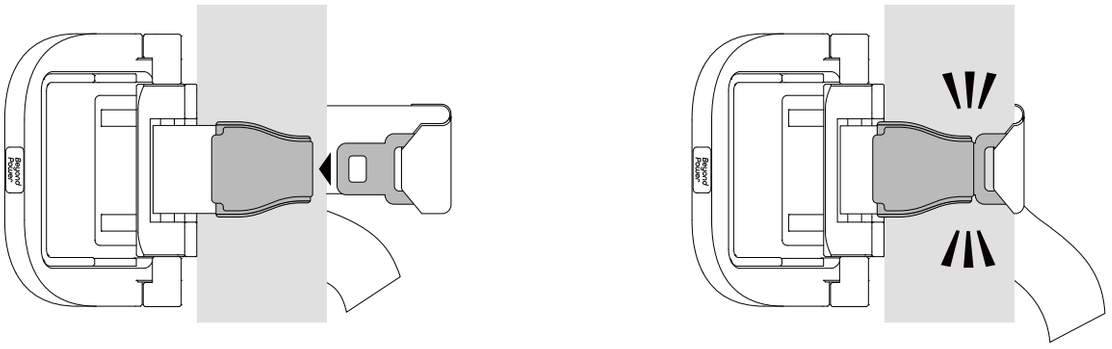

Replace the Strap

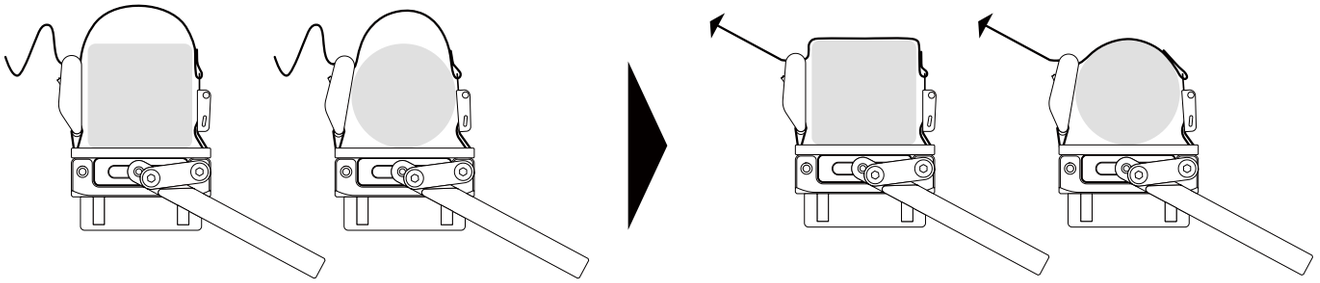

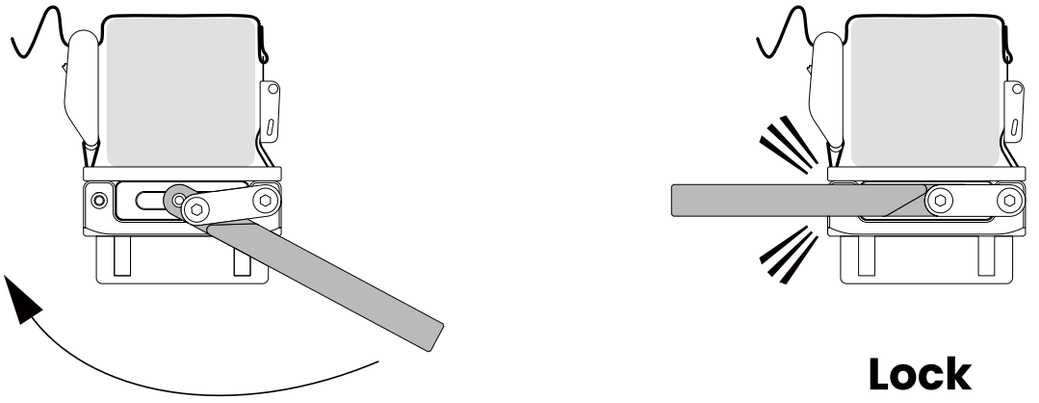

Thread the strap through the cam buckle by inserting one end into the opening on one side, guiding it over the cam mechanism, and pulling it through the opening on the other side.

Lock

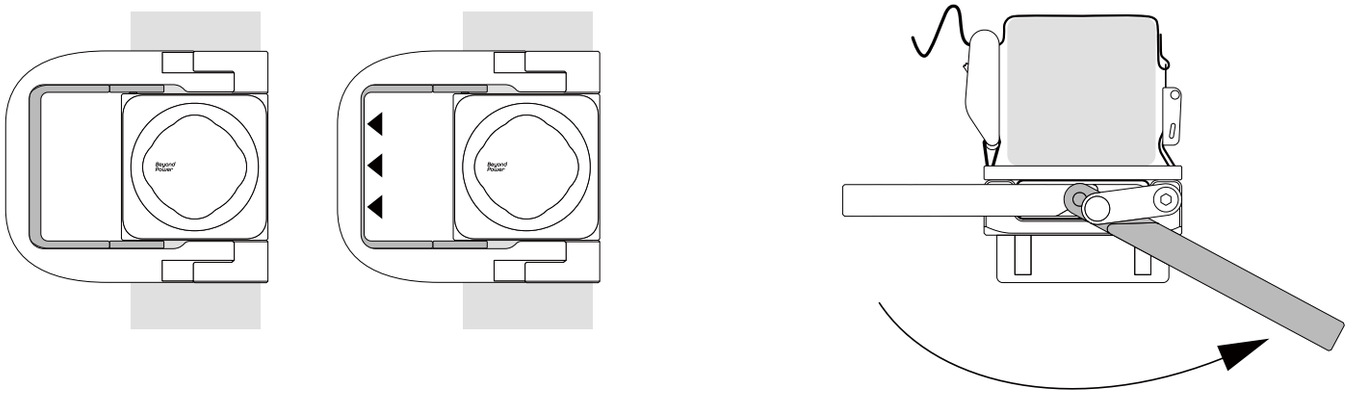

Fasten safety belt and adjust the length by strap cam buckle.

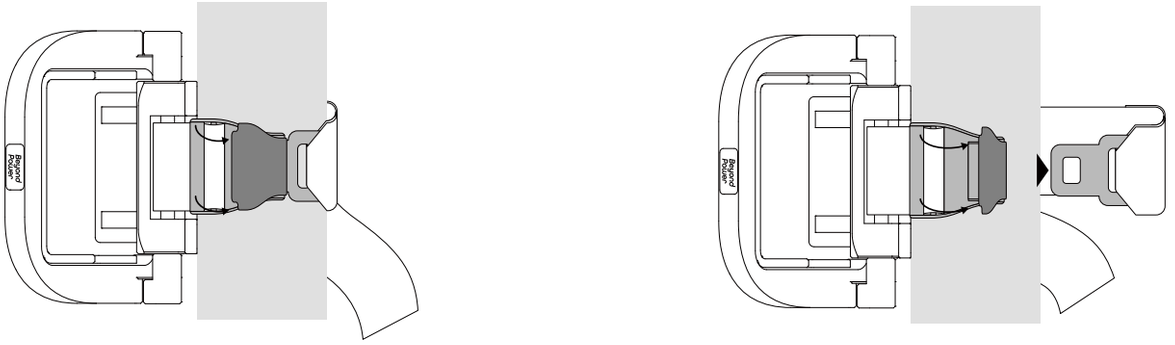

Lock

Pull the handle all the way down until you hear a click, ensuring that the mount is securely locked in place.

Unlock

Hold down the trigger and pull the handle to unlock the mount, then unfasten safety belt.

General Information

For your safety, and to ensure the best experience and maximum gains, it is critical that you read and understand this manual before you begin using the strap mount. If you are unsure about anything, it is recommended to stop using the product and consult the help manual or seek advice from a professional before continuing to use VOLTRA via our website, https://www.beyond-power.com/support, or by email at support@beyond-power.com.

Subject to compliance with laws and regulations, Beyond Power has the ultimate right to interpret the relevant documents of this product. When updated, revised, or terminated, no further notice will be given. Please visit the official Beyond Power website for the latest product information.

Important Safety Information

Minors

1. The strap mount is designed for individuals aged 18 and older. Keep children under the age of 13 away from VOLTRA I and the strap mount.
2. Teenagers aged 16 and above may use the strap mount under direct adult supervision if approved in advance by a physician. An adult should review all safety instructions with the minor before use.
3. Once again, keep children away from the strap mount. It contains parts, components, and functions that can cause severe injury or even death if used irresponsibly. Ultimately you are responsible for the safety of your children and anyone else you allow to use your strap mount.

Warning

1. It is the sole responsibility of the purchaser of Beyond Power products to read the owner's manual and instruct all individuals, whether they are the end user or supervising personnel on proper usage of the strap mount.
2. It is recommended that the strap mount be located in an access controlled area. Control is the responsibility of the facility owner. The extent of control is at the discretion of the owner.
3. Use the strap mount exclusively for the purposes described in the user manual; only perform the exercises for which the strap mount has been designed, following the instructions given in the manual. Any other use should be considered incorrect and therefore dangerous.
4. Do not allow users to wear loose fitting clothing and shoes while using the strap mount and VOLTRA I.
5. Do not use any accessories other than those recommended by Beyond Power. Attempting to repair or replace any damaged, worn, or broken parts not approved by Beyond Power could void the warranty. Please inform Beyond Power of any problems you experience.
6. The use of strap mounts and VOLTRA I is prohibited under the influence of alcohol, drugs, medication or sedatives.
7. Before you start exercising, check with your doctor the suitability of your workout for you, especially if you have a pacemaker or if you have other physical disabilities.
8. Stop exercising immediately if you experience nausea, dizziness or pain during your workout or after the workout, and consult your doctor.
9. This mount is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the product by a person responsible for their safety.

10. After outdoor use, all moisture, dust, and debris must be removed from the product, and the surface should be thoroughly dried before storage. Prolonged exposure to water, high humidity, or extreme environmental conditions (such as high altitude or direct water jets) may result in reduced performance, corrosion, or damage.
11. For safe operation of the strap mount and VOLTRA I, a safety zone is required: at least 83 inches (2.1 meters) on both sides of the mount. Depending on the exercise, the safety zone in front of the mount should be the length of VOLTRA I's cable. The space user needs for exercising, adding 20 inches (0.5 meters) to that as a buffer.
12. Before using the mount and VOLTRA I, make sure that there are no other people or objects within the safety zone.
13. Improper use may result in personal injury or strap mount damage, and removes all liability from the manufacturer and will void the warranty.
14. Always ensure the buckle is securely closed before use. Partial insertion and loose installation can cause strap mounts to detach unexpectedly. Never unassemble the strap mount from your rack if VOLTRA I is mounted.
15. Sudden release of Handle or other accessory will cause it to snap back uncontrollably and could result in serious injury or property damage. Maintain a firm grasp of your accessory during exercise. Ensure any hook or loop type accessories are fastened firmly before exercise. Carefully return the accessory to the start position before grip is released.
16. Never make adjustments to VOLTRA I during exercise as this may cause muscle strain. Always return the cable to the start position prior to making any adjustments to help prevent injury.
17. Do not overexert yourself or work to exhaustion. Use reasonable judgment when selecting the resistance range. Avoid using excessive resistance, which may cause injury.

Routine Inspection

The highest level of safety can only be ensured if the strap mount is regularly inspected for damage and wear. Always check the strap for any visible damage and wear before training.
