Dear customer,

Thank you for choosing a Kettler fitness device. Kettler Sport represents tradition, durability, and quality like no other home fitness brand. Classic home trainers such as the Golf have accompanied users for decades. At the same time, Kettler stands for innovation and continuously develops thoughtful solutions, particularly in usability and training comfort.

Kettler Sport provides everything you need for successful training at home: cardio and strength equipment, as well as a wide range of fitness accessories.

Further information can be found at www.fitshop.com/kettler.

Intended Use

The equipment may only be used for its intended purpose.

The equipment is suitable for home use and semi-professional use (e.g. hospitals, clubs, hotels, schools, etc.). The equipment is not suitable for commercial or professional use (e.g. fitness studio).

Europe's No.1 for Home Fitness

ABOUT THIS MANUAL

Please carefully read the entire manual before installation and first use. The manual will help you to quickly set up the system and explains how to safely use it. Make sure that all persons exercising with the equipment (especially children and persons with physical, sensory, mental or motor disabilities) are informed about this manual and its contents in advance. In case of doubt, responsible persons must supervise the use of the equipment.

Due to ongoing changes and software optimisations, the manual may have to be updated. If you notice any discrepancies during assembly or use, please refer to the manual uploaded to the webshop. The latest manual is always available there.

This equipment has been manufactured according to the latest safety knowledge. As far as possible, potential safety hazards which could cause injury have been eliminated. Make sure to carefully follow the instructions and that all parts are securely in place. If required, read through the instructions again to correct any mistakes.

Training devices must be classified according to accuracy and use. Accuracy classes are only applicable to devices that display training data.

Accuracy classes

Class A: high accuracy.

Class B: medium accuracy.

Class C: low accuracy.

The use classes explain the intended use of the training device.

Use classes

Class S (studio): professional and/or commercial use.

These training devices are intended for the use in training rooms of facilities such as sports clubs, school facilities, hotels, clubs and studios whose access and supervision is specifically regulated by the owner (person with legal responsibility).

Class H (home use): use at home.

These stationary training devices are intended for the use in private homes where access to the training device is regulated by the owner (person with legal responsibility).

Please pay close attention to the safety and maintenance instructions given here. The contract partner cannot be held liable for damage to health, accidents or damage to the equipment when it is not used in accordance with these instructions.

The following safety instructions may appear in this manual:

► **ATTENTION**

This notice indicates potentially hazardous situations which, if not avoided, may result in property damage.

⚠ **CAUTION**

This notice indicates potentially hazardous situations which, if not avoided, may result in slight or minor injuries!

⚠ **WARNING**

This notice indicates potentially hazardous situations which, if not avoided, may result in death or serious injuries!

⚠ **DANGER**

This notice indicates potentially hazardous situations which, if not avoided, will result in death or serious injuries!

ⓘ **NOTICE**

This notice indicates further useful information.

Retain these instructions in a safe place for future reference, maintenance or when ordering replacement parts.

1.2 Personal Safety

DANGER

- + Before you start using the equipment, you should consult your physician that this type of exercise is suitable for you from a health perspective. Particularly affected are persons who: have a hereditary disposition to high blood pressure or heart disease, are over the age of 45, smoke, have high cholesterol values, are overweight and/or have not exercised regularly in the past year. If you are under medical treatment that affects your heart rate, medical advice is absolutely essential.
- + Note that excessive training can seriously endanger your health. Please also note that heart rate monitoring systems can be inaccurate. If you notice any signs of weakness, nausea, dizziness, pain, shortness of breath, or other abnormal symptoms, stop exercising immediately and seek advice from your doctor if necessary.
- + The owner must communicate all warnings and instructions to the user.

WARNING

- + This equipment may not be used by children under the age of 14.
- + Children should not be allowed unsupervised access to the equipment.
- + Persons with disabilities must have a medical license and must be under strict observation when using the equipment.
- + The equipment is strictly for use by one person at a time.
- + If your equipment provides a safety key, the clip of the safety key must be attached to your clothing before starting your training. In the event of a fall, the EMERGENCY STOP of the equipment can be initiated.
- + There is a risk of injury from spinning pedals and/or an exposed flywheel in the absence of a freewheel. Never get on or off the equipment when the pedals or the flywheel are still moving. Always make sure that the pedals and the flywheel have come to a complete stop.
- + Support yourself with at least one hand on the handlebar when getting on and off the equipment. Only dismount from the equipment when the pedals have come to a complete stop.
- + Keep your hands, feet and other body parts, hair, clothing, jewellery and other objects well clear of moving parts.
- + During use, wear suitable sports clothing rather than loose or baggy clothing. When wearing sports shoes, make sure they have suitable soles, preferably made of rubber or other non-slip materials. Shoes with heels, leather soles, studs or spikes are unsuitable. Never exercise barefoot.

CAUTION

- + If your equipment needs to be connected to the power supply with a mains cable, make sure that the cable is not a potential tripping hazard.
- + Make sure that nobody is within the range of motion of the equipment during training so as not to endanger you or other persons.
- + Always tighten the pedal strap before you start training to prevent your feet from slipping.

 **CAUTION**

- + Be aware that if adjustment devices are left protruding, they may impede the user's movement.

 **ATTENTION**

- + Do not insert any objects of any kind into the openings of the device.
- + To protect the equipment from use by unauthorised third parties, always remove the power cable when not in use and store it in a safe place that is inaccessible to unauthorised persons (e.g. children).
- + Class B and C crank training equipment is not suitable for high accuracy purposes.

1.3 Electrical Safety

 **DANGER**

- + In order to reduce the risk of an electric shock, always unplug the equipment from the mains socket immediately after your workout, before assembly or dismantling, and before maintenance or cleaning. Do not pull on the cable.

 **WARNING**

- + Do not leave the equipment unattended while the mains cable is plugged into the mains socket. During your absence, the mains cable must be removed from the mains socket to prevent improper use by third parties or children.
- + If the mains cable or plug is damaged or defective, contact your contract partner. Until repair, the equipment must not be used.

 **ATTENTION**

- + The equipment requires a mains connection of 220-230 V with 50 Hz mains voltage.
- + The equipment may only be connected directly to an earthed socket using the supplied mains cable. Extension cables must conform to VDE guidelines. Always completely unwind the mains cable.
- + The socket must be protected by a fuse with a minimum fuse rating of "16 A, slow blow".
- + Do not make any changes to the mains cable or the mains plug.
- + Keep the mains cable away from water, heat, oil and sharp edges. Do not route the mains cable underneath the equipment or under a carpet or rug, and do not place any objects on top of it.
- + If your purchased item is equipped with a TFT console, software updates must be carried out regularly. Follow the instructions on the console to perform the update(s).
- + The software systems on gym equipment with TFT consoles are set up only for the pre-installed apps. Do not install any additional apps.

 **NOTICE**

- + The pre-installed apps on TFT consoles are produced and provided by external manufacturers. Fitshop does not take any responsibility for the availability, functionality or contents of these apps.
- + Hereby, Fitshop GmbH declares that the radio equipment type Wireless Connection (2.402 – 2.480 GHz) complies with Directive 2014/53/EU. The full text of the EU Declaration of Conformity is available at the following website: www.fitshop.com.

1.4 Set-Up Place

⚠ WARNING

- + Do not place the equipment in main corridors or escape routes.

⚠ CAUTION

- + Choose a location in which to place the equipment such that there is enough free space/clearance to the front, the rear and to the sides of the equipment.
- + The training room should be well ventilated during training and not be exposed to any draughts.
- + Choose the place in which to set up the equipment such that there is enough free space/clearance to the front, the rear and to the sides of the equipment.
- + The free area in the direction from which the exercise equipment is accessed must be at least 0.6 m larger than the exercise area.
- + The set-up and mounting surface of the equipment should be flat, loadable and solid.

▶ ATTENTION

- + The device may only be used in one building, in sufficiently tempered and dry rooms (ambient temperatures between 10°C and 35°C). The equipment should not be used outdoors or in rooms with high humidity (over 70%) like swimming pools.
- + A floor protective mat/equipment underlay can help to protect high-quality floor coverings (parquet, laminate, cork, carpets) from dents and sweat and can help to level out slight unevenness.
- + For Class S equipment, the exercise equipment may only be used in areas where access, supervision and control are specifically regulated by the owner.

2.1 General Instructions

DANGER

- + Do not leave any tools, packaging materials such as foils or small parts lying around, as otherwise there is a danger of suffocation for children. Keep children away from the equipment during assembly.

WARNING

- + Pay attention to the instructions attached to the equipment in order to reduce the risk of injuries.

CAUTION

- + Ensure to have sufficient room for movement in each direction during assembly.
- + The assembly of the equipment must be carried out by at least two adults. If in doubt, seek the help of a third technically skilled person.

ATTENTION

- + To prevent damage to the equipment and the floor, assemble the equipment on a mat or packaging board.

NOTICE

- + In order to make the assembly as simple as possible, some screws and nuts to be used can already be pre-assembled.
- + Ideally, assemble the equipment at its later set-up place.

2.2 Scope of Delivery

The scope of delivery consist of the following parts. At the beginning, check whether all parts and tools belonging to the device are included in the scope of delivery and whether damage has occurred. In the event of complaints, the contractual partner must be contacted directly.

CAUTION

If parts of the scope of delivery are missing or damaged, the assembly must not be carried out.

NOTICE

Batteries are not included in the scope of delivery. The following batteries are required: 2x AA

NOTICE

Required Tools: Allen key, Wrench, Screw Driver

2.3 Assembly

Before assembly, take a close look at the individual assembly steps shown and carry out the assembly in the order given.

NOTICE

- + First loosely screw all parts together and check that they fit properly. Tighten the screws using the tool only when you are instructed to do so.
- + If you have difficulty recognising the graphics, we recommend that you open and/or download the PDF instructions stored in the webshop on your end device (e.g. smartphone, tablet or PC). There you have the option of zooming in closer.

Step 1: Assembly of the Main Frame and the Stabilizers

NOTICE

It can make the assembly easier if you place some styrofoam underneath the main frame when performing the assembly step.

1. Attach the front stabilizer (2) to the main frame (1) with two bolts (32), two spring washers (34) and two flat washers (33).
2. Attach the rear stabilizer (3) to the main frame (1) with two bolts (32), two spring washers (34) and two flat washers (33).
3. Tighten the bolts with the tool.
4. If added previously, now remove the styrofoam.

Step 2: Assembly of the Handlebar, Seat Post and Pedals

1. Attach the handlebar (6) to the front post (5) with one L knob (90) and one flat washer (91).
2. Insert the seat post (4) into the main frame (1) by unscrewing and then pulling the L knob (50).

CAUTION

In the following step, make sure the knob (50) audibly engages in one of the adjustment holes of the seat post (4).

3. Release the L knob (50), make sure it engages in one of the adjustment holes on the seat post (4) and retighten the knob (50).

CAUTION

In the following step, make sure to screw in the pedals completely.

4. Attach the right pedal (23R) to the right crank (17R) with the wrench by turning clockwise.
5. Attach the left pedal (23L) to the left crank (17L) with the wrench by turning counterclockwise.

Step 3: Assembly of the Computer Fixing Plate, Bottle Holders, Seat and Protective Covers

1. Attach the computer fixing plate (9) to the handlebar (6) with two bolts (88) and two flat washers (89).
2. Attach the left and right bottle holders (82L & 82R) to the main frame (1) with two screws (69) each.
3. Slightly loosen the bolt connection underneath the seat (60).
4. Attach the seat (60) to the seat post (4) and retighten the bolt connection with the wrench.
5. Attach the left and right seat protective covers (12L & 12R) to the seat post (4) with one screw (69) each.
6. Tighten the bolts and screws with the tools.

Step 4: Assembly of the Computer

1. Remove the four pre-assembled screws (70) from the rear side of the computer (10).

► **ATTENTION**

Make sure not to pinch the cables when performing the following steps.

2. Pull the upper computer cable (104) through the hole of the computer fixing plate (9) as shown in Fig. A.
3. Attach a wire plug (61) to the upper computer cable (104) as shown in figure b and c.
4. Connect the upper computer cable (104) with the cable of the computer (10).
5. Attach the computer (10) to the computer fixing plate (9) with the previously removed screws (70) as shown in Fig. D.
6. Tighten the screws with the tool.

Step 5: Alignment of the Feet

If the floor is uneven, you can stabilize the equipment by turning the two setting screws under the main frame.

1. Lift the equipment to the desired side and rotate the setting screws under the main frame.
2. Rotate the screws clockwise in order to remove them and to raise the equipment.
3. Rotate them counterclockwise in order to lower the equipment.

Step 6: Adjustment of the Seat

Height Adjustment (A-1)

CAUTION

The seat post is marked with "STOP" for the minimum insertion depth. When adjusting, make sure not to exceed the minimum insertion depth.

1. Loosen and pull the knob (50) to adjust the height of the seat post.

CAUTION

In the following step, make sure the knob audibly engages in one of the adjustment holes.

2. Release the knob (50).
3. Retighten the knob (50).

Horizontal Adjustment (A-2)

1. Loosen and pull the knob (50) underneath the seat until it can be moved forward and backward.
2. Move the seat into the desired position.

CAUTION

In the following step, make sure the knob audibly engages in one of the adjustment holes. Release the knob (50).

3. Reighten the knob (50).

Tilt Adjustment (A-3)

1. Loosen the bolt connection underneath the seat until the tilt can be adjusted.
2. Adjust the desired tilt.
3. Retighten the bolt connection.

Step 7: Adjustment of the Handlebar

Height Adjustment (B-1)

⚠ CAUTION

The front post is marked with "STOP" for the minimum insertion depth. When adjusting, make sure not to exceed the minimum insertion depth.

1. Loosen and pull the knob (50) to adjust the height of the front post.

⚠ CAUTION

In the following step, make sure the knob audibly engages in one of the adjustment holes.

2. Release the knob (50).
3. Retighten the knob (50).

Horizontal Adjustment (B-2)

1. Turn the L knob (90) to the left until the handlebar can be moved.
2. Adjust the handlebar to the desired position.
3. Retighten the L knob (90) by turning it to the right.

2.4 Battery Replacement

1. Open the battery compartment (Fig. A).
2. Remove the batteries (Fig. A).

► **ATTENTION**

Pay attention to the correct pole arrangement in the following step.

3. Insert two new 1.5V AA-batteries (Fig. B).
4. Close the battery compartment (Fig. C).

Correctly Getting On and Off

1. To get on, grip the handles with both hands and first step onto the left pedal with your left foot or onto the right pedal with your right foot and then place your foot onto the other pedal.
2. To get off, grip the handles with both hands and place one foot next to the equipment and then the other foot.

3 OPERATING INSTRUCTIONS

① NOTICE

- + Familiarise yourself with all the functions and setting options of the device before starting training. Have the proper use of this product explained to you by a specialist.
- + Always start your training with low intensity and increase evenly and gently. End your training with a cool-down phase. If you are unsure, please consult your physician.

3.1 Console Display

TIME	<ul style="list-style-type: none"> + Display of the training time in minutes + Display range: 00:00 - 99:59 + Setting range: 00:00 - 99:00 (in 01:00 min. increments)
SPEED (KM/H)	<ul style="list-style-type: none"> + Display of the current speed in km/h + Display range: 00.0 - 99.9
RPM	<ul style="list-style-type: none"> + Display of the current revolutions per minute (RPM) + Display range: 0 - 999
DISTANCE (DIST)	<ul style="list-style-type: none"> + Display of the training distance in km + Display range: 0.00 - 99.99 + Setting range: 0.00 - 99.50 (in increments of 0.5 km)

CALORIES (KCAL)	<p> NOTICE These data serve as a rough guide for comparing your training sessions, they must not be used for medical purposes.</p> <ul style="list-style-type: none"> + Display of burned calories in kcal + Display range: 0.00 - 9999 + Setting range: 0.00 - 9990 (in increments of 10)
PULSE (BPM)	<p> WARNING Your training equipment is not a medical device. The heart rate measurement of this equipment may be inaccurate. Various factors can affect the accuracy of the heart rate measurement. The heart rate measurement serves only as a training aid.</p> <ul style="list-style-type: none"> + Display of your current pulse in beats per minute (BPM) + Display range: 0 - 230 + Setting range: 30 - 230 (in increments of 1) + Acoustic sound when set target value is exceeded + A heart symbol blinks when a pulse is detected

LOAD	<ul style="list-style-type: none"> + Display of the resistance level + Display range: 1 - 99 + Setting range: 1 - 99

3.2 Button Functions

MODE	<ul style="list-style-type: none">+ Press to enter setting of target values+ Press to confirm setting+ Press to lock value function when displayed in scan mode+ Press and hold for 2 seconds to reset the current setting value to 0
SET	<ul style="list-style-type: none">+ Press once to increase setting by one+ Press and hold for fast increase setting
RESET	<ul style="list-style-type: none">+ In MODE or SET, press once to clear current data+ Press and hold for 2 seconds for a complete reset
LOAD/EMERGENCY BRAKE (Knob)	<p> WARNING The knob also functions as an emergency brake.</p> <ul style="list-style-type: none">+ Turn to the right to increase the resistance level+ Turn to the left to decrease the resistance level+ Press and hold down for a full stop (emergency stop)

3.3 Emergency Brake

WARNING

Your equipment has a rigid drive without freewheel. To completely stop the rotation of the pedals and flywheel, the emergency brake must be applied.

The knob, which is centrally located on the main frame, serves as the central control element of the braking system. The knob allows you to apply the emergency brake in order to bring the pedals and the flywheel to a full stop, but also to adjust the training resistance.

Apply Emergency Brake

To completely stop the rotation of the pedals and the flywheel, press down the knob and keep it pressed until the pedals and flywheel stop moving.

Adjust the Resistance

1. To increase the resistance, turn the knob to the right.
2. To decrease the resistance, turn the knob to the left.

3.4 Turning on and Setting Up the Equipment

1. Before turning on the console, make sure the batteries are full and inserted correctly.
2. To start up the console, start pedalling or press any button.

The LCD display lights up and displays the full screen for 1 second with a beep sound.

① NOTICE

- + If there is no input or movement for 4 seconds, time is paused and the console enters standby mode.
 - + If there is no input or movement for 4 minutes, the console enters sleep mode.
3. When in standby or sleep mode, press any button to restart the console.

3.5 Energy Saving Mode

The console enters energy-saving mode (sleep mode) when the pedals have not moved for four minutes. Press any button to restart the console. The training data remains.

① NOTICE

If the console does not react, check the batteries and/or if the console cables are properly connected.

3.6 Training Instructions

The indoor cycle is equipped with a simple console displaying the most important training data. By default, the parameters time, distance and calories are displayed in an alternation of 5-second intervals. To lock a certain value (time, distance and calories), you can press MODE when the value is displayed. For easy and immediate training, simply start pedalling and the console will display the training data. For a more targeted training, you also have the option of setting target values for the parameters time, distance, calories and pulse.

3.6.1 Quick Start Function

1. To start the training without setting any training data, start pedalling.

The values for time, distance and calories will add up.

The values for speed, RPM and Watt will be displayed according to your training input.

The value for load will be displayed according to the chosen resistance level.

ⓘ NOTICE

The value for BPM will only be displayed if a compatible chest strap is used.

2. To adjust the resistance, turn the load knob.
3. To pause the training, stop pedalling.
4. To stop the training, stop pedalling and press and hold down the load knob for a full stop of the pedals and the flywheel.

3.6.2 Setting Target Values

You can set target values for time, distance, calories and/or pulse.

NOTICE

Please note that a compatible chest strap is needed for displaying and setting a value for pulse.

You can enter the settings in the following order: TIME (training time) - DIST (distance) - KCAL (calories) - BPM (pulse).

1. To start up the console, press any button or pedal briefly.
2. To set target values for TIME, DIST, KCAL and/or BPM, press MODE.

The console switches to training time and "TIME" blinks.

3. To skip the setting for TIME, press MODE again.
4. To select and enter a value for TIME, press SET.
5. To set the desired training time, press SET (press and hold for fast increase) until the desired value is reached.
6. To confirm the setting and continue with the next parameter, press MODE.

The console switches to distance and "DIST" blinks.

7. To skip the setting for DIST, press MODE again.
8. To select and enter a value for DIST, press SET.
9. To set the desired distance, press SET (press and hold for fast increase) until the desired value is reached.
10. To confirm the setting and continue with the next parameter, press MODE.

The console switches to calories and "KCAL" blinks.

11. To skip the setting for KCAL, press MODE again.
12. To select and enter a value for KCAL, press SET.
13. To set the desired calorie value, press SET (press and hold for a fast increase) until the desired value is reached.
14. To confirm the setting and continue with the next parameter, press MODE.

The console switches to pulse and "BPM" blinks.

WARNING

Your training equipment is not a medical device. The heart rate measurement of this equipment may be inaccurate. Various factors can affect the accuracy of the heart rate measurement. The heart rate measurement serves only as a training aid. Over-exercise may result in serious injury or death. If you feel faint, stop exercising immediately.

15. To skip the setting for BPM and start the training, press MODE again.
16. To select and enter a value for BPM, press SET.
17. To set the desired pulse, press SET (press and hold for a fast increase) until the desired value is reached.

18. To confirm the setting and start the training and countdown of set target values, press MODE and start pedalling.

All set values (time, distance and calories) will count down from the set target values to 0.

Any remaining target values will count up.

The values for speed, RPM and Watt will be displayed according to your training input.

The value for the load will be displayed according to the chosen resistance level.

① NOTICE

The value for BPM will only be displayed if a compatible chest strap is used.

If a target value for BPM has been set, an acoustic sound will signal if the set value is exceeded.

19. To adjust the resistance, turn the load knob.

20. To pause the training, stop pedalling.

21. When you have reached the first set target value, an acoustic signal will sound.

→ The training ends.

22. Stop pedalling and press and hold down the load knob for a full stop of the pedals and the flywheel.

3.7 Compatibility Training Apps

This indoor cycle is equipped with a wireless technology interface which allows you to connect the console to different training apps via your mobile device such as a smartphone or tablet. You can find and download the training apps in the app stores of Google or Apple.

NOTICE

- + Your mobile device must be compatible with the wireless technology interface of the indoor cycle.
- + Make sure that wireless technology is activated on your mobile device and that the console is active. To activate the console, simply tap any button.
- + Third-party apps are produced and provided by external manufacturers. Changes and availability of these apps may occur and/or differ. Fitshop holds no responsibility for the availability, functionality or content of these apps.
- + Paid subscriptions may be required for the access and/or full functionality of the training apps.

Your fitness equipment is compatible with several training apps. These include:

- + Kinomap
- + iConsole+
- + ZWIFT
- + MyHomeFIT

1. Make sure that wireless technology is activated on your mobile device and the console of the indoor cycle is active.
2. Open the training app.
3. Select your fitness equipment. You can find the name on a small sticker on the back of the console.
4. Follow the instructions given in the app.

3.7.1 Connection with Kinomap

NOTICE

- + Please note that a paid subscription is required for the full functionality of Kinomap.
 - + Third party apps are produced and provided by external manufacturers. Changes and availability within these apps might occur. Fitshop does not take any responsibility and can not be held liable for the availability, functionality or contents of these apps.
 - + Make sure wireless technology is enabled on your mobile device and the console is active. Otherwise, simply tap any button.
5. Open Kinomap on your mobile device.
 6. On the main screen, select "More" in the bar at the bottom.
 7. Now select "Device management" on this page. Currently connected devices are displayed here.
 8. To add a new device, tap the "+" at the top right.

① **NOTICE**

There may be slight differences in menu navigation between Android and iOS operating systems.

9. Now select the type of device. You can choose from roller trainer, exercise bike, treadmill, cross trainer and rowing machine. For the IC70 Smart, select Indoor Cycle.
10. On the next page, you will see the different brands. Select "Taurus" and then the IC70 Pro Smart.
11. Now all wireless technology sources in the surrounding area are displayed. Select a wireless technology source that begins with i-Console The number that follows is also written on a small sticker on the back of the console.

The device is now added.

12. Return to the main menu, select a track and enjoy a great track video.

3.8 Wireless Technology and Fitness Apps

This console is equipped with a wireless technology interface. Please take note that your mobile device needs to be compatible with the wireless technology interface of the treadmill.

To use training apps you will have to activate the wireless technology function on your mobile device (tablet or smart phone) and start the fitness app. Select your fitness equipment. Please follow the instructions given in the app. You will find the name of your fitness equipment on a small sticker on the back of the console.

You will find the fitness apps in the app stores of Google or Apple. There you will find the apps "Kinomap" or "Zwift". Please note that these apps are produced by an external manufacturer. Fitshop does not take any responsibility regarding the availability, functionality or contents of these programmes.

IMPORTANT NOTE

The pre-installed apps are produced and provided by external manufacturers. Changes and availability within these apps might occur. Fitshop does not take any responsibility and can not be held liable for the availability, functionality or contents of these apps. To make sure the pre-installed apps are working correctly, they must be updated regularly. If needed, the respective app will notify you to do so. To update the app, you need a google account. A google email is sufficient. Just follow the instructions on the screen to perform the update.

Please note: The system is set up only for the pre-installed apps. Do not install any additional apps as their proper functionality can not be guaranteed. The installation of other apps might cause technical issues.

Example: Kinomap

4.1 General Instructions

When training, it is important to perform the exercises correctly in order to avoid injuries and achieve the desired training effect. Make sure you use the correct technique and train at an appropriate intensity level. Always consult an expert such as a trainer or doctor if you are unsure or have health problems. Always start your training with a low load and increase it evenly and gently.

End your training with a cool-down phase. If you have any questions or uncertainties, contact your doctor.

4.1.1 Training clothes

During training, wear appropriate sports clothing that is comfortable and breathable. Avoid clothing that restricts you or is uncomfortable. Make sure that your shoes are suitable and offer you sufficient support. In addition, always carry a towel with you to wipe away sweat and keep the equipment clean.

4.1.2 Warming up and stretching

It is important to warm up and stretch properly before training to avoid injury and improve performance. Stretching helps to loosen muscles and improve flexibility. Be sure to incorporate a short stretching routine before each workout.

Warm-up exercise:

1. Stand upright with your feet about shoulder-width apart.
2. Start with gentle arm circles by slowly moving your arms forwards in small circles in a controlled manner.
3. Perform arm circles backwards to loosen your shoulders and arms.
4. Do squats by slowly squatting down and then straightening up again. Make sure that your knees do not extend beyond your toes.

CAUTION

Do not exercise with sore muscles or take it easy on the affected muscles, as this can lead to injuries.

4.1.3 Medication

If you regularly take medication and want to exercise, it is important to be aware of possible side effects. Ask your doctor whether your medication affects your workout.

4.1.4 Used muscle groups

Rowing uses the following muscle groups:

- + Gluteal muscle
- + Leg muscles

Make sure you keep your back straight during training. Do not hunch over and do not arch your back.

4.1.5 Exercise frequency

Regular exercise is crucial to making progress and staying healthy in the long term. Continuous exercise can strengthen muscles, improve endurance and enhance overall well-being. Remember that even small workouts can be done regularly to achieve long-term results.

Training with heart rate orientation

Heart rate orientation guarantees an extremely effective and healthy training. Through your age and the following table, you can quickly and easily read and determine the optimal pulse for your training. An acoustic alarm will sound if your heart rate exceeds the set target heart rate. Which target heart rate is important for which training goal can be found out in the following.

Fat burning (weight management): The main goal here is to burn deposits of fat. In order to achieve this training goal, a low training intensity (approximately 55% of the maximum heart rate) and a longer training period are required.

Cardiovascular training (cardio training): The primary goal is to increase stamina and fitness through an improved provision of oxygen through the cardiovascular system. In order to achieve this training goal, medium intensity (approximately 75% of the maximum heart rate) with a medium training period is required.

Anaerobic (maximum) load training: The main goal of maximum load training is to improve recovery after short, intense loads in order to be able to quickly return to the aerobic zone. In order to achieve this training goal, a high intensity (approximately 90% of the maximum heart rate) with short, intense load is required, which is followed by a recovery phase in order to prevent muscle fatigue.

Example:

For a 45-year-old man, the maximum heart rate is 175 ($220 - 45 = 175$).

- + The fat burning target zone (55%) is at approximately 96 beats/min. = $(220 - \text{age}) \times 0.55$.
- + The cardio target zone (75%) is at approximately 131 beats/min. = $(220 - \text{age}) \times 0.75$.
- + The maximum heart rate for an anaerobic load training (90%) is at approximately 157 beats/min. = $(220 - \text{age}) \times 0.9$.

5.1 General Instructions

⚠ WARNING

- + The storage location should be chosen so that improper use by third parties or children can be prevented.
- + If your equipment does not have transportation wheels, the equipment must be disassembled before transportation.

▶ ATTENTION

- + Make sure that the equipment is protected from moisture, dust and dirt in the selected storage location. The storage location should be dry and well ventilated and have a constant ambient temperature between 10°C and 35°C.

5.2 Transportation Wheels

▶ ATTENTION

If you want to transport your equipment over particularly sensitive and soft floor coverings, such as parquet, planks or laminate, lay out the transport route with cardboard or similar to avoid possible floor damage.

1. Stand behind the equipment and lift it until the weight is transferred to the transportation wheels. After that, you easily can move the equipment to a new position. For long transport distances the equipment should be disassembled and safely packed.
2. Select the new location by following the instructions in the section 1.4 of this manual.

6.1 General Instructions

WARNING

- + Do not make any improper changes to the equipment.

CAUTION

- + Damaged or worn components may affect your safety and the life of the equipment. Safety can only be guaranteed if you check the equipment regularly for wear and damage. Immediately replace damaged or worn components. In such a case, contact the contract partner. The equipment must not be used until it has been repaired. If necessary, use only original spare parts.

ATTENTION

- + In addition to the instructions and recommendations for maintenance and care given here, additional service and/or repair work may be necessary; this must only be carried out by authorised service technicians.

6.2 Faults and Fault Diagnosis

The equipment undergoes regular quality controls during production. Nevertheless, faults or malfunctions may occur. Frequently, individual parts are responsible for these disturbances, an exchange is usually sufficient. Please refer to the following overview for the most common errors and how to correct them. If the equipment still does not function properly, contact your contract partner.

Fault	Cause	Solution
Cracking in the pedal area	Pedals loose	Tighten the pedals
Equipment wobbles	Equipment is not level	Align the feet
Handlebar/saddle wobbles	Loose screws	Tighten screws firmly
Display is blank/is not working	Batteries empty or loose cable connection	Replace batteries or check cable connections
No pulse display	<ul style="list-style-type: none"> + Sources of interference in the room + Unsuitable chest strap + Wrong position of chest strap + Chest strap defective or battery empty + Pulse display defective 	<ul style="list-style-type: none"> + Eliminate sources of interference (e.g. mobile phone, WLAN, lawn mower and vacuum cleaner robot, etc. ...) + Use a suitable chest strap (see RECOMMENDED ACCESSORIES). + Reposition chest strap and/or moisten electrodes + Changing batteries

6.3 Error Codes and Troubleshooting

The electronics of the equipment continuously carries out tests. In case of deviations, an error code appears on the display and normal operation is stopped for your safety.

Please contact the contract partner for technical support.

6.4 Maintenance and Inspection Calendar

To avoid damage from body sweat, the equipment must be cleaned with a damp towel (no solvents!) after each training session.

The following routine tasks must be performed at the specified intervals:

Part	Weekly	Monthly
Display console	C	I
Plastic covers	C	I
Screws and cable connections		I
Check pedals for tightness		I
Legend: C = clean; I = inspect		

7 DISPOSAL

At the end of its operational life, this equipment cannot be disposed of in normal household waste. Instead, it must be disposed of via an electricals recycling centre. Further information can be obtained from your local authority's recycling service.

The materials can be recycled as per their symbols. Through the reuse, recycling of materials or other forms of recovery of old equipment, you make an important contribution to the protection of the environment.

8 RECOMMENDED ACCESSORIES

To make your training experience even more efficient and pleasant, we recommend that you add suiting accessories to your fitness equipment. For indoor cycles this could for example be a **floor mat**, which makes your fitness equipment stand more securely and also protects the floor from sweat or **silicone spray** to keep moving parts in good shape. For many indoor bikes it is possible to replace the **saddle** or **pedals**, as these are usually the same mounts used on bicycles.

If you have purchased a fitness machine with pulse training and want to train your heart rate, we strongly recommend that you use a compatible **chest strap**, as this ensures optimum transmission of the heart rate.

Our range of accessories offers the highest quality and makes training even better. If you would like to find out more about compatible accessories, please go to the detail page of the product in our webshop (the easiest way is to enter the article number in the search field above) and go to the recommended accessories on this page. Alternatively, you can use the QR-code provided. Of course, you can also contact our customer service: by telephone, e-mail, in one of our branches or via our social media channels. We will be happy to advise you!

9.1 Serial Number and Model Name

In order to provide you with the best possible service, please have the model name, article number, serial number, exploded drawing and parts list ready. The corresponding contact options can be found in chapter 10 of this operating manual.

NOTICE

The serial number of your equipment is unique. It's located on a white sticker. The exact position of this sticker is shown in the following illustration.

Enter the serial number in the appropriate field.

Serial number:

9.3 Exploded Drawing

Products from Kettler® are subject to strict quality control. However, if a fitness equipment purchased from us does not work perfectly, we take it very seriously and ask you to contact our customer service as indicated. We are happy to help you by phone via our service hotline.

Error Descriptions

Your fitness equipment is developed for long-term, high-quality training. However, should a problem arise, please first read the operating instructions. For further assistance, please contact your contract partner or call our service hotline. To ensure your problem is solved as quickly as possible, please describe the defect as exactly as possible.

In addition to the statutory warranty, we provide a warranty for every fitness equipment purchased from us according to the following provisions.

Your statutory rights are not affected.

Warranty

The warranty is the first/original buyer and/or any person who received a newly purchased product as a gift from the original buyer.

Warranty period

The warranty periods, shown on our web shop, begin on delivery of the fitness equipment. The respective warranty periods for your equipment can be found on its product website.

Repair Costs

According to our choice, there will either be a repair, a replacement of individual damaged parts or a complete replacement. Spare parts, that have to be mounted while assembling the equipment, have to be replaced by the warranty holder personally and are not a part of repair. After the expiration of the warranty period, the responsibility for parts costs, repair costs, installation costs and delivery costs lies with the warranty holder.

The terms of use are defined as follows:

- + Home use: solely for private use in private households up to 3 hours per day
- + Semi-professional use: up to 6 hours per day (e. g. rehabilitation centres, hotels, clubs, company gyms)
- + Professional use: more than 6 hours per day (e. g. commercial gyms)

Warranty Service

Within the warranty period, equipment which develops faults as a result of material or manufacturing defects, will be repaired or replaced at our discretion. Ownership of equipment or parts of equipment which have been replaced is transferred to us. The warranty period is not extended nor does a new warranty period begin following repair or replacement under the warranty.

Warranty Conditions

For the warranty to be valid, the following steps must be taken:

Please contact our customer service by email or phone. If the product under warranty has to be sent in for repair, the seller bears costs. After expiry of the warranty, the buyer bears the costs of transport and insurance. If the fault is covered by our warranty, you will receive a new or repaired equipment in return.

Warranty claims are invalid in case of damage resulting from:

- + misuse or improper handling
- + environmental influences (moisture, heat, electrical surge, dust, etc.)
- + failure to follow the current safety measures for the equipment
- + failure to follow the operating instructions
- + use of force (e. g. hitting, kicking, falling)
- + interventions which were not carried out by one of our authorized service centres
- + unauthorised repair attempts

Proof of Purchase and Serial Number

Please make sure that you are able to provide the appropriate receipt when claiming on your warranty. So that we can clearly identify the model of your equipment, and for the purposes of our quality control, you will need to give the serial number of your equipment, when contacting the service team. Where possible please have your serial number and your customer number ready when you call our service hotline. It will help us to deal with your request swiftly.

If you cannot find the serial number on your fitness equipment, our service team is at your disposal to offer further information.

Service outside of the Warranty Period

We are also happy to issue an individual cost estimate if there is a problem with your fitness equipment after the warranty has expired, or in cases which do not fall under the terms of the warranty, e. g. normal wear and tear. Please contact our customer service team to find a quick and cost-effective solution to your problem. In such a case you will be responsible for the delivery costs.

Communication

Many problems can be solved just by speaking to us as your specialist supplier. We know how important it is to you as a user of the fitness equipment to have problems solved quickly and simply, so you can enjoy working out with minimal interruption. For that reason, we also want to resolve your queries quickly and in a straightforward manner. Thus, please always keep your customer number and the serial number of the faulty equipment handy.
